

# FRONTEND DEVELOPER

✉ [homayoun763@gmail.com](mailto:homayoun763@gmail.com) [🔗 Portfolio](#) [📘 Homayoun](#)

## SUMMARY

---

**Frontend developer** with over 3.5 years of experience working with **Next.js**, **React.js**, and **TypeScript**. I build applications that load quickly, handle growth, and are easy for users to navigate. I have worked on complex features, reduced **page load times**, improved **component structure**, and optimized how pages render to make large applications run more smoothly.

## SKILLS

---

**Languages/Frameworks/Libraries:** JavaScript, TypeScript, React.js, Next.js, React Query, Zustand

**Style:** CSS, Sass, Tailwind CSS, DaisyUI, CSS-in-JS

**Testing:** Vitest, React Testing Library, MSW

**Other:** Git, Figma, SEO, PWA, React Hooks, SSR, OOP, CMS, GSAP

## WORK EXPERIENCE

---

### Frontend developer

**Jul 2025 - Present**

*Freelancer*

*(5 months)*

- **Implemented** PWA features (offline caching, Add-to-Home, asset preloading), **contributing** to a 25% increase in user engagement.
- **Built** a custom internal dashboard for inventory, orders, and task management, **reducing** manual work by 35% based on workflow analysis and client feedback.

### Frontend developer

**Aug 2022 - Jul 2025**

*Iransamaneh*

*(3 years)*

- **Tested** over 100 components and multiple websites using Vitest, **ensuring** code reliability and robustness. This comprehensive testing approach significantly **reduced** bug reports and improved overall application stability.
- **Modernized** multiple legacy websites by implementing responsive layouts and improving accessibility, **resulting** in a 25% increase in user engagement.
- **Enhanced technical SEO** and Core Web Vitals, **boosting** organic traffic by 30%, conversions by 20%, and revenue by 15%.
- **Revamped** Iransamaneh admin panel by **designing** 8 new administrative modules and **implementing** 12+ workflow automation features to streamline user processes.

## PROJECTS

---

**Nexca** ( *JavaScript, Typescript, Next JS, React, Tailwind CSS, SSR, Vitest, React Testing library, CMS, etc.* )

- **Developed** a CMS with server-side rendering (SSR) to improve first-page load speed and SEO. **Used** OOP patterns to organize the code so new features can be added without rewriting existing parts.
- **Created** 10+ custom React hooks that **reduced code duplication**, improving the maintainability of the codebase.

## LANGUAGES

---

**German:** Limited working proficiency

**English:** Professional working proficiency

**Persian:** Native
